

# Customize on Screen

## Brief Overview

You can use Customize on Screen to simplify the content creation experience by building and customizing Launchers directly on the Application screen.

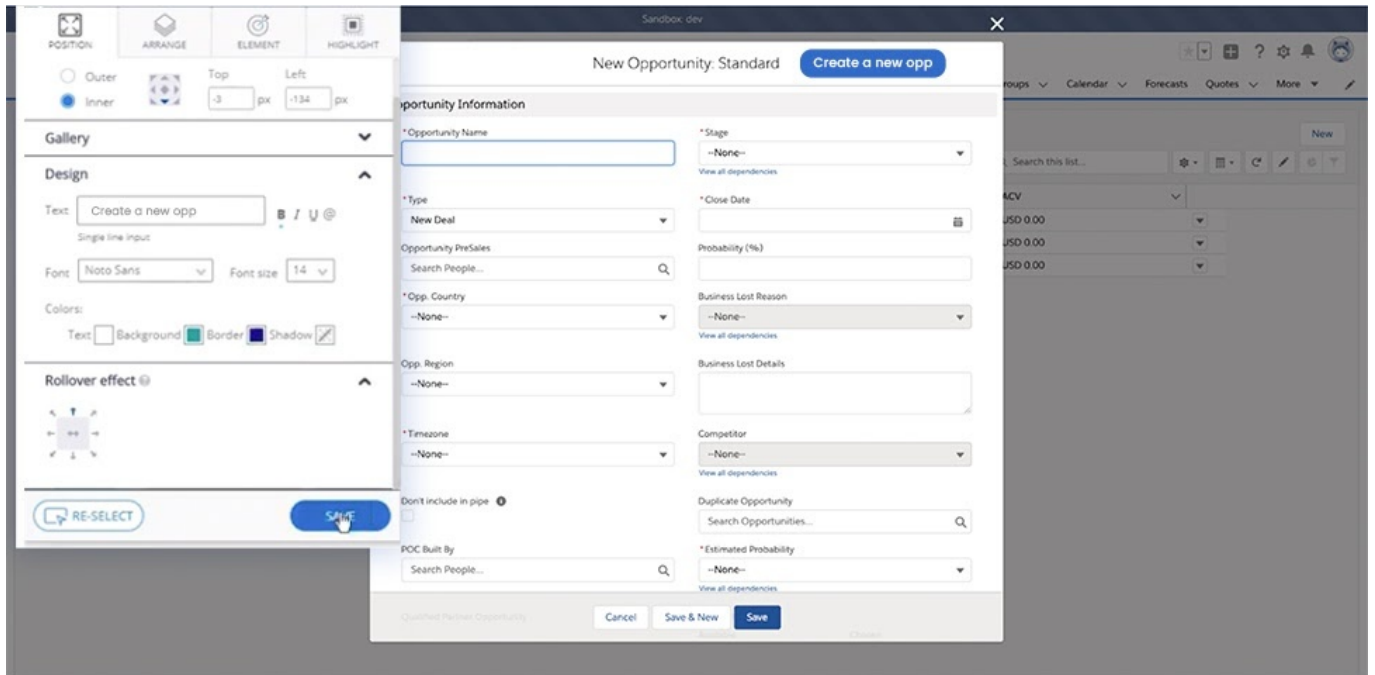

Customizing your Launchers on-screen allows greater control and ease of building. You can see how changes will affect the appearance of your Launcher as you make them.

Note: This feature is currently only available for Launchers.

## How It Works

There are several options available to further customize Launchers directly on the screen as you are building:

- Position
  - Adjust the position of the Launcher on the screen
- Design
  - Change the text, font style, size, color, background color, and shadow
- Gallery
  - Select a new design from the gallery, including ones that you have previously created

## Video Demo

Enjoy this video explaining how to get the full benefits of using Customize on Screen to create your Launchers.
