

# <u>How to Change WalkMe Environment in</u> <u>Workstation</u>

### Brief Overview

This article explains how to change the environment that is required for content builders in order to test the published content.

#### Instructions

Environment can be changed by using the following Slash Command in the Menu:

#### /change-env xxx

xxx - Production, Test, Success (not case sensitive)

Example:

<mark>رسانی</mark>	Help	Onboarding	Resources	- □ ×
Q	/change	e-env test		⊗ 🖬 🛆 🗸

After clicking Enter on your keyboard there will be an indication of the current environment (Only for Test or Success environments).
