

How to Preview WalkMe Content in Workstation

Brief Overview

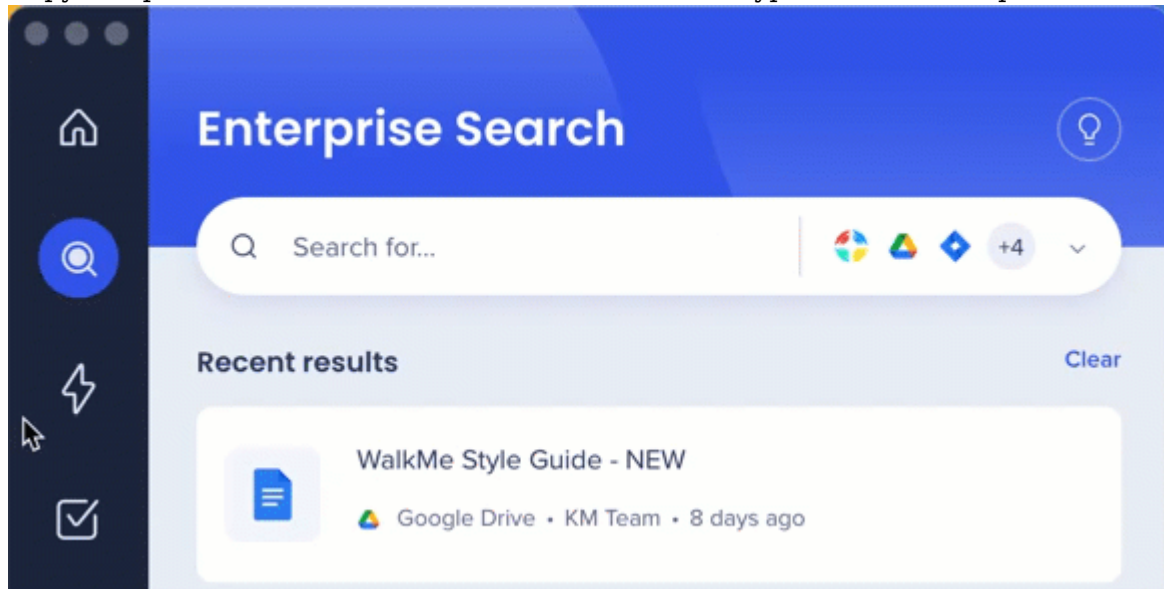

While creating content for the Workstation, builders may want to test their work without having to save, publish, and refresh with each change.

With content preview, builders can preview content instantly from the Editor.

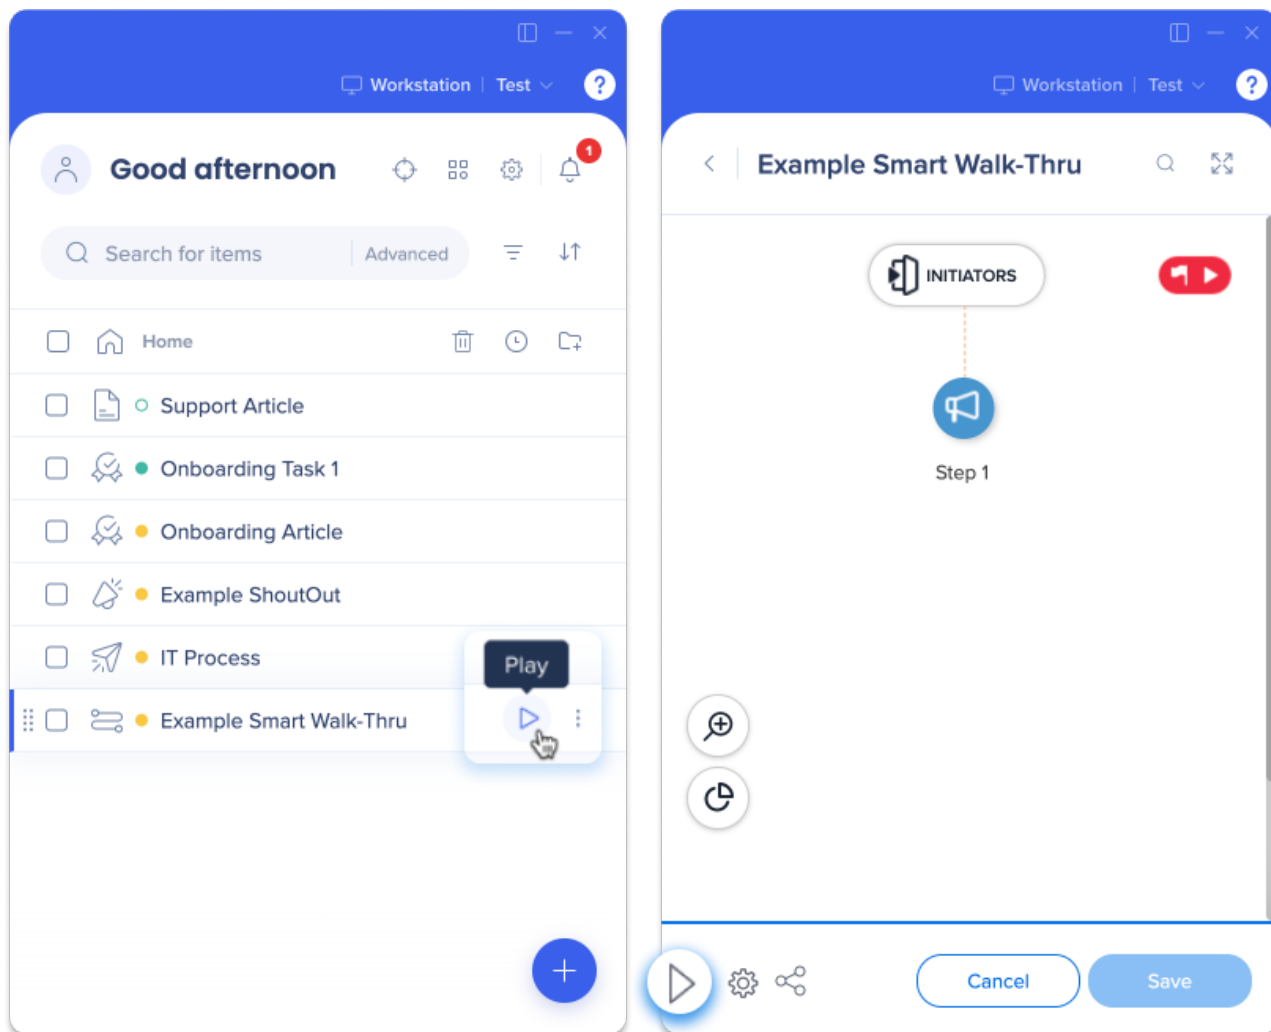

How to Preview Content in Workstation

1. Open **Workstation**
2. Copy and paste **/editor-mode-on** in the search bar or type it in the Enterprise Search tab

3. Workstation instantly disappears
4. Open the Editor and select a Smart Walk-Thru in the Workstation system
5. Click Play to preview it

How to Stop “Preview Mode”

1. Click on the **Workstation icon**, which is located on the **status bar** for macOS and in the **tray** for Windows
2. Select **Exit Editor Mode** to reopen Workstation and stop preview mode
