Mobile Activity Logs

The Activity Log is a simple collaboration tool for you to keep track of changes made to items in your account, including the time/date, user, system, action, description.
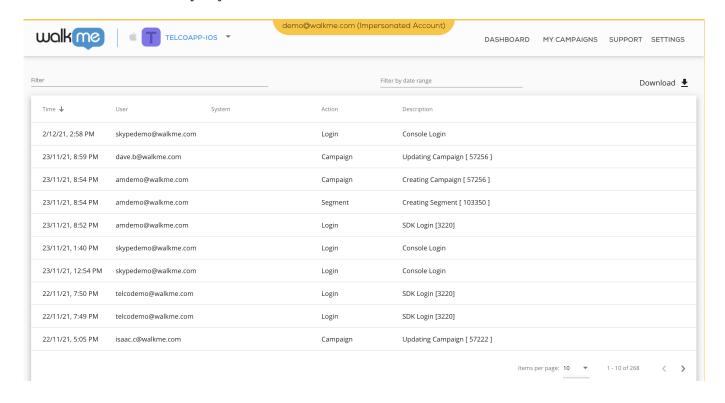

The Short Version

The Mobile Activity Log is where users can track all the activities conducted in their WalkMe Mobile account, such as content creation and configuration changes.

Having the visibility and monitoring capabilities becomes more important as:

- Global organizations want to monitor the activities of branches/regions
- Content is managed across different environments

How to Access

1. Navigate to the WalkMe Mobile Console at console.mobile.walkme.com
2. Click on the Settings tab and select "Activity Logs"
3. By default, you will see the activity logs for ALL apps in the Account
    - Note: filter by keyword and/or date

Activity Logs Breakdown

Variables	Description
Time	Time in which the log was registered
User	The console user who performed the action
System	The app in which the action was performed
Action	What action was performed
Description	Short description for the action including identifiers
