

Mobile: Using the Review & Publish Tab In the Campaign Wizard

Reviewing Your Campaign and Its Publication Status

When you want a summary of your Campaign's properties, and/or to change its status from Not Published to Published or vice versa, there's only one place to do it. Enter the REVIEW & PUBLISH screen:

The screenshot shows the 'REVIEW & PUBLISH' tab in the Walkme Campaign Wizard. At the top, there are navigation links: 'EDIT CAMPAIGN', 'EDIT AUTO PLAY', and 'REVIEW & PUBLISH' (which is highlighted). A 'SAVE & EXIT' button is in the top right corner. The main content area is divided into two sections: 'REVIEW' and 'PUBLISH STATUS'. The 'REVIEW' section contains two boxes. The first box, titled 'CAMPAIGN NAME', shows 'MY SHOUTOUT' with an 'EDIT' link and 'API Trigger' set to 'None'. The second box, titled 'AUTO PLAY', shows 'STATIC TRIGGER' (High priority) with settings for 'Once per session', 'Every 2nd week', and 'Unlimited impressions'. It also shows the audience as 'HEAVY SHOPPERS AUDIENCE'. To the left of these boxes is a preview of a mobile app interface showing a 'WHO'S A GOOD DOG?' quiz. The 'PUBLISH STATUS' section shows a red toggle switch and the text 'Not Published'. At the bottom left, there is an 'EDIT CAMPAIGN' link.

You can get here by entering the Mobile Console, clicking on MY CAMPAIGNS, and either clicking Edit on an existing Campaign or creating a new Campaign and clicking *REVIEW & PUBLISH* from the EDIT CAMPAIGN screen.

Use Cases

In the Review & Publish tab you can do the following:

- Get a quick view of the Campaign's design
- Edit the Campaign Name and [API trigger](#) key
- View a summary of the Auto-Play settings
- Publish your Campaign, which will activate the campaign by its set auto-play.
 - Notice that access to a campaign from links in other campaigns does not require publishing it.

- For example, if you have a launcher linked to a shoutout (menu) which links to several SWTs or other campaigns, you only need to publish the launcher since all other content is linked.

Once you're satisfied the information is correct and you've toggled the Campaign to *Published* or *Not Published* (as appropriate), click *SAVE & EXIT* on the right side of the screen to save your changes.
