

Workstation Mobile App Introduction

Brief Overview

The [Workstation](#) mobile app brings the power of Workstation to your mobile devices – a single touchpoint for employees to access workplace needs from anywhere. It enables enterprise mobility by helping employees connect to their workplace remotely so they can instantly find information and execute business processes via an intuitive mobile experience.

Use the Workstation mobile app on your organization's tablets and smart phones.

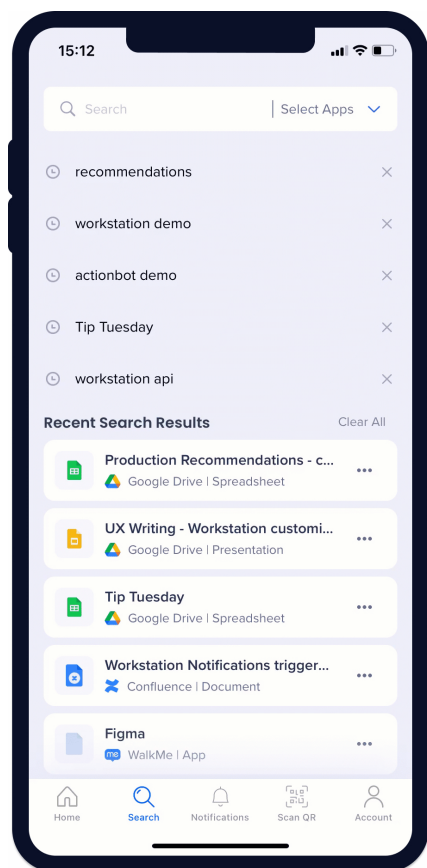

The benefits of using Workstation for mobile are numerous, and the impact can be felt across different industries and use cases. For example:

- Sales representatives can use Workstation on their mobile devices to access customer data, sales metrics, and marketing materials from their mobile devices, allowing them to close deals faster and stay ahead of the competition.
- Field service technicians can use Workstation to access service tickets, work orders, and equipment manuals from their mobile devices, allowing them to diagnose and resolve issues quickly and efficiently.
