

Salesforce AppExchange Installation Notification

During the process of installing WalkMe, you may receive a message from alerting you that you are installing a non-Salesforce Application. This message will be visible when installing WalkMe on Lightning, Salesforce Communities, or setting up an Activate Now banner.

This message is displayed for every installation that is not part of the Salesforce AppExchange Marketplace. Joining Salesforce's AppExchange means committing to AppExchange as a go-to-market channel. WalkMe for Salesforce is not and does not plan to become part of Salesforce AppExchange.

WalkMe meets the most extensive compliance standards including ISO 27001:2013, SOC 2 and STAR Certification to name just a few. We are also committed to Safe Harbor and Privacy Shield privacy protection standards. Our product infrastructure is hosted on secure Amazon Cloud servers.
