

# Salesforce Lightning URLs

**Note:** The Salesforce URL structure is changing with Salesforce's Summer '18 release. Details about this change and how to address it are [here](#).

Rules in Salesforce Lightning are commonly based upon the URL in order to create Splits or Start Points in a Walk-Thru, to define Segmentation, or create Goals.

Here is a quick reference of URLs and Rule Types to use for some of the most common Salesforce Lightning tabs:

Page	URL and Rule Type
Leads Main Page	Current URL contains "/Lead/list"
Lead Record	Current URL contains "/00Q" AND Current URL contains "view"
Account Main Page	Current URL contains "/Account/list"
Account Record	Current URL contains "/001" AND Current URL contains "view"
Contacts Main Page	Current URL contains "/contact/list"
Dashboards Main Page	Current URL contains "/Dashboard/home"
Dashboards Record	Current URL contains "/01Z" AND Current URL contains "view"
Opportunities Main Page	Current URL contains "/Opportunity/list"
Opportunities Record	Current URL contains "/006" AND Current URL contains "view"
