

# WalkMe Mobile User Management – Roles & Permissions

WalkMe Mobile now supports different role types for users with access to the mobile console and power mode.

Configuring role types allows for organizations to manage the users collaborating on WalkMe Mobile projects.

The three role types are:

1. Content Editor
  - Create and edit campaigns, segments, goals, etc
  - Capture steps, elements, screens in power mode
2. Publisher
  - Publish campaigns and goals
3. Admin
  - App management in the console
  - Create and download reports

Roles are defined in mobile back-office on the user details screen. Please reach out to your WalkMe rep to enable user roles.

## User Group

Group

Role

Role types can be configured in tandem so a single user can have multiple roles assigned.

Note: a user with no role assigned (default state) has no limitations

For a full breakdown of each role and respective permissions review the table below:

WalkMe Modules			Permissions		
			Admin	Publisher	Content Moderator
My campaigns	Campaigns	Edit	View	View	Moderate
		Copy	View	View	Moderate
